RESPONSIBLE RECREATION

ENJOY THE YUBA SAFELY

The river changes. Boulders shift. Debris can obstruct familiar swim ways.

Look for obstructions by scouting safe landings and swim routes with a mask.

2 GRIP

Granite is smooth and slick. Wet granite is slippery.

Use three points of contact when walking through and across rocks.

3 PROTECT

Moving water is powerful. Limb entrapments may be hidden.

Tuck arms and legs toward the mid-line of the body to avoid being trapped under water.
